This is book has the 2010 American Heart Association guidelines ...By CustomerThis is book has the 2010 American Heart Association guidelines that is required for basic CPR First Aid training. Note: The guidelines change every 5 years. The new books with the 2015 guidelines should be available in early 2016. It takes the AHA about a year to make the books available start teaching the new guidelines once the guidelines are announced.0 of 0 people found the following review helpful. Good Reference!By TheDanaKThis student work book is excellent to have on hand. I initially purchased it for the certification course, even though we were told we did not have to have the book to complete the course. However, I like to keep reference books like this on hand for reminders. The AHA certification lasts two years, so I think it is valuable for me to have a resource to

reference in between certification courses. I believe there is a newer version that has been released at this point but there aren't too many differences.0 of 0 people found the following review helpful. A Great ResourceBy Jane H. JonesEasy to read and good illustrations. Chapters were well-planned. Had just the information I needed for the class and it's a good source for review.
