Dana Oakes : Hemodynamic Monitoring: A Bedside Reference Manual (2004 - Old 4th edition) before purchasing it in order to gage whether or not it would be worth my time, and all praised Hemodynamic Monitoring: A Bedside Reference Manual (2004 - Old 4th edition):

Perhaps one of the lesser understood concepts of respiratory medicine, Oakes' Hemodynamic Monitoring presents a comprehensive bedside pocket reference on all aspects of hemodynamics. Students have found this to be an invaluable resource when trying to master the concepts, particularly in studying for the CRT and RRT credentialing exams.

Professionals will find this as comprehensive a resource as exists on the subject. Content includes an overview of hemodynamic monitoring, an overview of cardiopulmonary physiology, monitoring techniques, alterations in cardiopulmonary functioning, pharmacology, and more.

About the Author Dana Oakes, BA, RRT-NPS. Mr. Oakes is currently an Educational Consultant and was formerly Director of Respiratory Care, VA Medical Center, Washington, D.C.; Educational Coordinator/Instructor, Respiratory Care Department, Children's Hospital National Medical Center, Washington, D.C.; and Director of Clinical Education, Respiratory Care Program, Columbia Union College, Takoma Park, MD. Mr. Oakes has been in the Respiratory field for over 28 years and has over 14 years of teaching experience including one-, two-, and four-year advanced Respiratory Care programs.
