4EVER40This book has been my 'bible' (figuretively speaking)ever since I purchased it. I am a Registered Nurse who
writes all the clinical content, including rehab, for a home health software company. This book is so inclusive from the
most updated PPS/OASIS/HIPPA home health standards for each discipine (PT, OT, SLP, MSW, even RD-Dietary) to
care planning, to documentation with samples of each. There's far more than that even. I think it would be great for
someone in a supervisor position in the home health setting. I don't know how I ever lived without this book (for my

job, that is).
