**ICD-10-CM Snapshot 2016 Orthopaedics—Noninjury**

Orthopaedics-Noninjury Coding Tip

Diagnosis codes are to be used and reported at their highest number of characters available. A code is invalid if the full number of characters required for that code, including the 7th character, if applicable, have not been assigned.

For codes requiring a 5th character, assign 9 (unspecified), 1 (right), or 2 (left).

For codes requiring a 6th character, assign 1 (right), 2 (left), or 9 (unspecified).

The inclusion of the - [dash] symbol indicates that an additional digit is needed.

**American Medical Association : ICD-10 Snapshot 2016 Coding Cards Orthopedics** before purchasing it in order to gage whether or not it would be worth my time, and all praised ICD-10 Snapshot 2016 Coding Cards Orthopedics:

These new AMA coding cards offer a snapshot of the ICD-10-CM codebook, providing the most commonly reported diagnostic codes and associated guidelines for a specialty. The cards detail the specificity required to improve documentation. Pushpin icons help Snapshot users connect coding tips back to specific codes. These easy-to-use reference cards allow health care providers and staff members to quickly locate a desired code.
