**Dr. Debby Feinberg : If The Walls of My Exam Room Could Talk** before purchasing it in order to gage whether or not it would be worth my time, and all praised If The Walls of My Exam Room Could Talk:

0 of 0 people found the following review helpful. One StarBy Lynn M.alot of bragging about patients but no insight on how to help them0 of 1 people found the following review helpful. GreatBy LeeA great book, addressing what I'm hoping might be the cause of my dizziness symptoms over the past 8 years.1 of 3 people found the following review helpful. While they can be very useful in many casesBy FirebirdI am a BVD expert. I found Dr. Feinberg's book (she

is an optometrist and not a medical doctor) to be over promotional on the use of prism glasses. While they can be very useful in many cases, not all patients will respond. BVD is not a new discovery. All ophthalmologists and optometrists are trained in diagnosing BVD in their professional training. The "pioneer" was an optometrist called Dr. Raymond Roy. Dr. Roy trained many optometrists, some of whom are practicing today. If a patient feels he or she has these symptoms, they will find BVD experts in their own communities who are able to prescribe prism glasses. We applaud Dr. Feinberg for her continued zeal in promoting the cause of BVD.

Who would have thought that a basic eye alignment problem could cause a person to be miserable or disabled? Yet that is exactly what is happening with Vertical Heterophoria (VH), a visual condition where there is a slight vertical image misalignment which causes headaches, dizziness, anxiety, neck pain and reading difficulties. Using techniques developed by Dr. Debby Feinberg, patients are fit with prism eyeglass lenses that realign the images, resulting (on average) in an 80% reduction of symptoms. This book contains the stories of those suffering from VH, their difficult journey through life and the medical system, and their recovery and return to health using just a simple pair of properly prescribed prism lenses. Who, indeed, could have supposed that a mere ocular defect could have given rise to so serious a train of evils and who that had not seen it, could believe that the correction by glasses of the eye trouble could have given a relief so speedy and so perfect that the patient described it as a miracle? Dr. S. Weir Mitchell, Neurologist and Headache Specialist Philadelphia, PA Headaches and Eye Strain, April 1876

About the Author Dr. Debby Feinberg is Director of Vision Specialists of Michigan, where she has been performing pioneering work on Vertical Heterophoria since 1995. She and her colleagues have successfully treated over 7000 patients locally, nationally and internationally utilizing realigning prismatic eyeglass lenses. She resides in Commerce Township, Michigan, is the mother of two wonderful boys, and is married to Dr. Mark Rosner. Dr. Mark Rosner is Director of Research at Vision Specialists Institute, the research and teaching arm of Vision Specialists of Michigan. He has been the main writer on all of the academic papers and posters. He and Dr. Feinberg and other members of the research team have presented this information at local, national and international conferences. He is a practicing Emergency Physician, and is married to Dr. Debby Feinberg. Sherry Brantley is the author of several books including: Choices The Power is Within You, and Seven Successful Strategies for Divorced Parents. She is an Inspirational Speaker and a CLC (Certified Life Coach) specializing in Goal-Setting, with a concentrated focus on completing the all-important steps to attaining goals. Sherry's next project includes Sweet Potato Pie for the Heart, a compilation of true, personal stories submitted by people who have had unique, uplifting experiences that have been life-changing for them in some way.
