**Alina Fratila, Alina Zubcov-Iwantscheff, William P. Coleman : Illustrated Guide to Eyelid Periorbital Surgery: Applied Anatomy, Examination, Blepharoplasty (Aesthetic Methods for Skin Rejuvenation Series)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Illustrated Guide to Eyelid Periorbital Surgery: Applied Anatomy, Examination, Blepharoplasty (Aesthetic Methods for Skin Rejuvenation Series):

A successful series of illustrated guides on a variety of esthetic dermatological procedures is now followed by the first

surgical reference work. The Illustrated Guide to Eyelid and Periorbital Surgery uses the tried and-tested concept of "hands-on" teaching, communicating practical knowledge to the specialist using a structured approach and eye-catching illustrations. Aspects of eyelid correction are presented from the expert's point of view, starting with the anatomical details of the eyelid region, via pre- and postoperative management, the way to the individual surgical procedures. The instructions are clear and vivid, so they can be readily and independently implemented by the reader. Basic cutting and suturing techniques are taught using intraoperative photographs and high-quality illustrations. Individual indications are tackled with regard to individual planning, the operation and complication management.
