From Academic Press : Immunology, Inflammation and Diseases of the Eye before purchasing it in order to gage whether or not it would be worth my time, and all praised Immunology, Inflammation and Diseases of the Eye:

This selection of articles from the Encyclopedia of the Eye provides a comprehensive overview of immunological features, diseases and inflammation of the eye and its support structures and organs. Rather than taking an immunological focus that is strictly suitable for clinicians, the volume offers a considerable basic science background and addresses a broad range of topics - the immune system of the eye, its various disorders, mechanisms of inflammation of the eye and visual system, treatment, wound healing mechanisms, stem cells, and more. The first single volume to integrate comparative studies into a comprehensive resource on the neuroscience of ocular immunology. Chapters are carefully selected from the Encyclopedia of the Eye by the world's leading vision

researchersThe best researchers in the field provide their conclusions in the context of the latest experimental results

About the AuthorIn addition to his role as Senior Scientist and Co-Director at the Schepens Eye Research Institute, Dr. Reza Dana holds the Claes H. Dohlman Chair in Ophthalmology at Harvard Medical School. He is Director of the Cornea Refractive Surgery Service at the Massachusetts Eye Ear, and serves as the Vice Chairman of the Harvard Department of Ophthalmology and Associate Chief of Ophthalmology for Academic Programs at Massachusetts Eye and Ear. After graduating Summa Cum Laude from St. Pauls School in New Hampshire, he completed his bachelors (Phi Beta Kappa), graduate, and medical education at Johns Hopkins University. He performed his residency in Ophthalmology at the Illinois Eye and Ear Infirmary in Chicago, followed by a clinical fellowship in Cornea and External Diseases at the Wills Eye Hospital in Philadelphia. Reza then completed additional fellowship training in Immunology and Uveitis at the Massachusetts Eye and Ear Infirmary, and in Ocular and Transplantation Immunology at the Schepens Eye Research Institute. Dr. Dana also holds a Master of Science degree in Management from Harvard University. Reza has been a member of the full-time Harvard faculty since 1995. As a clinician-scientist, he has a particular interest in the molecular and cellular mechanisms of inflammation as they pertain to the ocular surface and anterior segment pathologies, including dry eye, allergy, wound healing responses, and transplant rejection.
