United Nations : Impact of AIDS, The (Population Studies Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Impact of AIDS, The (Population Studies Series):

This study on the global impact of HIV/AIDS (Human Immunodeficiency Virus/Acquired Immunodeficiency Syndrome), is divided into two parts. In part one, the following areas are identified and examined: a look at the data, sources and methods in compiling this report; an examination of the general demographic impact of AIDS; a more focused study of this impact on households, firms, agriculture, education, the health sector and economic growth. Part two offers summaries of selected studies set out in part one on the impact of HIV/AIDS. One of the greatest challenges facing developing countries is the HIV/AIDS epidemic, which poses a serious threat to the economic wellbeing and future prospects of these nations. This report makes extensive use of information and data studies by the UN and other

specialized agencies.
