Kenneth V. Iseron Dr. : Improvised Medicine: Providing Care in Extreme Environments before purchasing it in order to gage whether or not it would be worth my time, and all praised Improvised Medicine: Providing Care in Extreme Environments:

1 of 1 people found the following review helpful. Communal disaster care.By AnonymouslyGreat book. Highly recommend. Lots of subject that you want to know about, and a lot of ideas and solutions that you'd never think off, usually backed up by/supported by facts Very comprehensive. This book is geared towards providing care for lots of people or communities. If you're looking for combat medicine, get this book, plus "Emergency War Surgery by

Department of the Army. "0 of 0 people found the following review helpful. Must readBy mmeeksThis is hands down one of the best supplemental readings to standard paramedic education. This book helped me think outside the box and become a more dynamic paramedic.3 of 3 people found the following review helpful. A med manualBy Hans JensenThis book is really detailed and well sourced. A medial manual with great advice, its not folksy or too simple in any way. I recomend this book

Deliver quality healthcare in the most challenging field conditions "Dr Iserson has given us a most remarkable book. Many readers may be familiar with David Werner's lay healthworker book, *Where There Is No Doctor*; this new volume could be titled *Where There Is a DoctorBut No Stuff*. Drawing from his experience providing care in international, wilderness, and disaster settings, he has compiled an impressive collection of bare-bones equipment and work-around strategies to provide the best possible care in resource-poor settings. While presenting many creative examples, the purpose of the book is not to offer an exhaustive list of solutions to missing resource challenges but to inspire creativity in readers who may find themselves needing to improvise." -- Family Medicine Full of practical clinical pearls and proven strategies, this indispensable guide shows you how to operate outside your comfort zone and devise effective treatment solutions when the traditional tools (medications, equipment, and staff) are unavailableor when you need to provide care outside of your specialty. *Improvised Medicine* is a must for anyone who plans to work in global, disaster, or other resource-poor settings. FEATURES: Simple-to-follow directions, diagrams, and illustrations describe practical techniques and the improvised equipment necessary to provide quality care during crises. Contains improvisations in anesthesia and airway management, dentistry, gynecology/obstetrics, infectious disease/laboratory diagnosis, internal medicine, otolaryngology, pediatrics and malnutrition, orthopedics, psychiatry, and surgery. Also includes basic disaster communication techniques, post-disaster forensics, a model hospital disaster plan, and innovative patient-transport methods. LEARN HOW TO: Make an endotracheal tube in seconds Perform digital-oral and blind-nasotracheal intubations Make plaster bandages for splints/casts Give open-drop ether, ketamine drips, and halothane Use subcutaneous/intraperitoneal rehydration/transfusion Make ORS and standard nutrition formulas Clean, disinfect, and sterilize equipment for reuse Warm blood units in seconds inexpensively Take/view stereoscopic x-rays with standard equipment Quickly and easily stop postpartum hemorrhage Fashion surgical equipment from common items Evacuate patients easily for high-rise hospitals Make esophageal and precordial stethoscopes Quickly improvise a saline lock Make ECG electrode/defibrillator pads and ultrasound gel
