Scott Kahan, Jonathan E. Teitelbaum MD, Kathleen O. DeAntonis MD : In A Page Pediatrics (In a Page Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised In A Page Pediatrics (In a Page Series):

2 of 2 people found the following review helpful. Impressive amount of info.By MailinnThis book offers an impressive amount of info in just 2 pages per syndrome/disease. Love it for boards reading up on topics you'll find on

the office, however it lacks some acute issues you may find in the hospital. For instance, Electrolyte imbalances...a book like Inpatient Pediatrics sheds a great deal of light on that subject, but the book itself is physically larger.0 of 0 people found the following review helpful. One StarBy ManDoes not offer much explanation. Also, treatment and management steps are not clear.0 of 0 people found the following review helpful. in very good conditionBy alexthe book was in much better condition than it was described the book is in very good condition. I am very pleased with the seller and my order. I was expecting the book to have some noticeable damage but i dont see any and the pages are like new.

Featuring a uniquely visual two-page-spread design that is great for rapid reference or review, In a Page Pediatrics, Second Edition provides a quick overview of the diseases, symptoms, and injuries most commonly seen in children. Each disease is presented on a two-page spread in boxes with consistent headings: introduction; etiology, epidemiology, and risk factors; patient presentation; differential diagnosis; diagnostic evaluation; treatment and management; and prognosis and complications. Bulleted key points appear under each heading. This edition features expanded differential diagnosis sections, an appendix of common symptoms and differential diagnosis, and more coverage of pharmacologic treatment. This pocket-sized book is ideal for interns, medical students in clerkships, or USMLE review. It will also appeal to physician assistant and nurse practitioner students.
