Courtney I. P. Thomas : In Food We Trust: The Politics of Purity in American Food Regulation (At Table)
before purchasing it in order to gage whether or not it would be worth my time, and all praised In Food We Trust: The
Politics of Purity in American Food Regulation (At Table):

One of the great myths of contemporary American culture is that the United States's food supply is the safest in the world because the government works to guarantee food safety and enforce certain standards on food producers, processors, and distributors. In reality U.S. food safety administration and oversight have remained essentially the same for more than a century, with the Pure Food and Drug Act and the Federal Meat Inspection Act of 1906 continuing to frame national policy despite dramatic changes in production, processing, and distribution throughout the twentieth century. *Food We Trust* is the first comprehensive examination of the history of food safety policy in the United States, analyzing critical moments in food safety history from Upton Sinclair's publication of *The Jungle* to Congress's passage of the 2010 Food Safety Modernization Act. With five case studies of significant food safety crises ranging from the 1959 chemical contamination of cranberries to the 2009 outbreak of salmonella in peanut butter, *Food We Trust* contextualizes a changing food regulatory regime and explains how federal agencies are fundamentally limited in their power to safeguard the food supply.
