Political reality defeats perfectionBy CustomerThis is a good and readable compendium of the author's experience with and knowledge of a number of so-called health systems (I doubt that a single genuine system exists anywhere much less a perfect one). His principal point is apt that the sociological,

cultural, and political factors that apply, country by country, preclude any of them achieving a system that organizational logic would lead to perfection. It's a good read of 0 people found the following review helpful. Good ReadingBy Hugo EstradaExcelente reading for that ones that want to learn of what is available in Health Systems

But that is what is delivered by Mark Britnell, Global Chairman and Senior Partner for Health at consultancy KPMG... The book is a great, level-headed summary of where we are today.' Healthcare Business International 'The book describes health care systems across the globe. It makes the point that no country has the perfect solution and it invites the reader to consider how countries as disparate as Indonesia and Switzerland have developed solutions to the bespoke challenges in their respective countries. It is beautifully written and as the fly note says, each chapter can be read in the time it takes to drink a cup of coffee.'
