Barbara Gruendemann RN MS FAAN CNOR, Sandra Stonehocker Mangum RN MN CNOR : Infection Prevention in Surgical Settings, 1e before purchasing it in order to gage whether or not it would be worth my time, and all praised Infection Prevention in Surgical Settings, 1e:

This handbook is the first of its kind to discuss infection control guidelines that directly relate to surgical

environments. It is particularly useful to nurses who need to meet OSHA and JCAHO requirements for practice in perioperative, PACU, ambulatory, and endoscopy settings. Procedure guidelines are concisely described and followed by rationales referenced to AORN standards, CDC guidelines, and other resources. Provides an easy-to-use reference to common, significant infection control practices issues found in various surgical and other related settings. Brings together the work of recognized experts and professional associations that provide factual, relevant, and succinct rational and correct interpretation of infection control practices. First handbook devoted to infection control issues that directly relate to surgical environments. Follows a consistent format presentation for each procedure that includes the steps, rationale, references, and suggested additional readings. Spanish version also available, ISBN: 84-8174-615-0
