Kent Heckenlively : Inoculated before purchasing it in order to gage whether or not it would be worth my time, and all praised Inoculated:

55 of 60 people found the following review helpful. A Must Read Before it is too Late!By K. StollerWhile the public-at-large does not yet realize that our science and relevant governmental agencies have been bought and sold, Heckenlively explains it all in detail using the revelations from CDC whistle-blowers about why we have the mysterious autism epidemic. The CDC Scientists Preserving Integrity, Diligence and Ethics in Research (SPIDER) is perhaps the most profound whistle-blower event ever and now all with eyes and ears know that the CDC is a den of

pseudo-science and corruption that has sold-out our children for job security and money. The horrible crime against humanity that technocrats at our most trusted agencies perpetrated on the world's children will undoubtedly go down as one of the greatest crimes against mankind in recorded history, and if that sounds grandiose and incredulous, read *Inoculated* if you dare. 31 of 35 people found the following review helpful. This book is amazing, and a beautiful blend of a personal story ...By Dr. Jennifer Vaughn This book is amazing, and a beautiful blend of a personal story and an historical perspective on the subject of vaccine evolution. MUST READ! Kent is a brilliant writer and speaks from a loving (and subjective) view as he lays the facts before us in the most compelling and objective ways. Thanks, Kent. Best I've seen in a long time. 34 of 40 people found the following review helpful. Dr. Paul author of *The Vaccine-Friendly Plan* gives *Inoculated* a must read 5-star review. Hidden treasures throughout this book. By Paul Thomas MD *Inoculated* is a must read for those wanting both the history of the autism/vaccine research and the CDC entanglement and fraud surrounding this issue. Read detailed accounts of the mercury / thimerosal research and what happened at Simpsonwood. His explanation and details about the various studies used by the CDC to declare vaccines as safe and not linked to autism (Verstaeten - Pediatrics 2003, Hviid Study, Mardsen Study, Stehr-Green Study, and Miller et al.) outlines the shameful conflicts of interest and poor study design flaws. Chapter 7 - The Legal View, gives the best insight into the unfortunate National Childhood Vaccine Injury Act, passed in 1986, often referred to as "vaccine court" that has resulted in complete immunity from liability for vaccine manufactureres and doctors who give them, while essentially making it near impossible for vaccine injured children and their families to get any compensation. Next we get the best details I've seen to date of what happened with the William Thompson's whistle blower data and Dr Brian Hookers article with the real CDC data that had been left out. There is a hidden gem near the end: Dr Naviaux's research on the cell danger response. I've heard him speak recently and he is onto something. Interestingly, he uses a mouse model for autism that he creates through "maternal immune activation" meaning "the mother is given an infection, or some sort of adjuvant to stimulate an immune response". !!!!! Did you catch that !!!!! Read this book.

In November of 2013, Simpson University biology professor, Dr. Brian Hooker got a call from Dr. William Thompson, a senior scientist at the Centers for Disease Control and Prevention (CDC) working in vaccine safety. Their conversations would lead to explosive revelations that top officials at the CDC engaged in a systematic cover-up of data showing that earlier administration of the MMR vaccine caused increased rates of autism in children, particularly African-American males. Thompson would eventually turn over thousands of the documents to US Congressman William Poesy. Science teacher and author, Kent Heckenlively, was granted access to this unprecedented trove of documents and uses them, as well as ground-breaking interviews with any of the key players in this debate, to tell the story of how vaccines have become a thirty-year disaster since passage of the 1986 National Childhood Vaccine Injury Act which gave pharmaceutical companies complete immunity for damages caused by their products.
