Colleen Flood : International Health Care Reform: A Legal, Economic and Political Analysis (Routledge Studies in the Modern World Economy) before purchasing it in order to gauge whether or not it would be worth my time, and all praised International Health Care Reform: A Legal, Economic and Political Analysis (Routledge Studies

in the Modern World Economy):

This book analyses the wave of competition-oriented reform by comparing "internal market reform" (proposed in publicly-funded health care systems) with "managed competition reform" (proposed in systems with a mixture of public/private financing) and the role of "managed care" in each of these reform theories. *International Health Care Reform* clearly explains the arguments in economics and justice for intervention by governments in health care markets; the structure and dynamics of health care systems; and the features of competition-oriented reform models. The book will appeal to students and researchers involved in health policy studies, public health and health economics. It will also be a valuable read for policy-makers internationally.

About the Author Colleen M. Flood is Professor at the Faculty of Law, University of Toronto, Canada.
