Penelope Moyers EdD OT/L FAOTA, Patricia Finch-Guthrie PhD RN : Interprofessional Evidence-Based Practice: A Workbook for Health Professionals before purchasing it in order to gauge whether or not it would be worth my time, and all praised Interprofessional Evidence-Based Practice: A Workbook for Health Professionals:

Interprofessional Evidence-Based Practice: A Workbook for Health Professionals promotes active, team learning of interprofessional evidence-based practice (EBP). This book is distinctive in that it departs from the tradition of evidence-based practice occurring from a single disciplinary perspective. Interprofessional evidence-based practice is described in terms of a dynamic team process that blends the patients preferences and values, the expertise of practitioners from multiple disciplines, and incorporates multidisciplinary evidence. Teams learn to use the nine

phases in the interprofessional process to challenge current disciplinary paradigms and biases to create an integrated approach to patient care, healthcare delivery, or population health. Drs. Penelope Moyers and Patricia Finch Guthrie focus on developing and fostering collaboration between academic institutions and healthcare organizations so that students and faculty participate on interprofessional teams with mentors and staff from a healthcare organization. *Interprofessional Evidence-Based Practice: A Workbook for Health Professionals* also addresses the communication and cross-organizational factors important for supporting the work of the team. Common team and mentoring issues encountered in EBP are clearly articulated, along with the iterative problem-solving approaches necessary to mitigate temporary stumbling blocks. The book provides detail for developing and launching an Interprofessional Evidence-Based Practice program that goes beyond the evidence process to include implementation science to support practice change. Approaches for developing partnerships for supporting this type of program between universities and health care institutions are contained within, including sample partnership agreements and resource-sharing strategies. Inside *Interprofessional Evidence-Based Practice: A Workbook for Health Professionals*, each chapter includes performance objectives, key words, checklists, and materials and resources that an interprofessional team can use. PowerPoint lectures, mentor newsletters, forms, tools, and other resources are included on a companion website to guide team learning about key EBP topics, as well as to support the program coordinators and team mentors in their work with the interprofessional teams. *Interprofessional Evidence-Based Practice: A Workbook for Health Professionals* is the go-to resource for those who want to engage in interprofessional evidence-based practice, and for leaders who want to develop and implement an interprofessional evidence-based practice program.

This is a remarkable resource for interprofessional, evidence-based practice with both theoretical and practical resources. The significance of training health professionals to engage in interprofessional collaboration cannot be overlooked in this changing healthcare arena. -Yolanda Griffiths, OTD, OTR/L, FAOTA, College of Saint Mary, Doodys Service
