**Andrew P Costa, John P Hirdes, Sergio Arino-Blasco : Interrai Emergency Department (Ed) Assessment System Manual: For Use with the Interrai Ed Screener (Eds) and Ed Contact Assessment (Ed-CA)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Interrai Emergency Department (Ed) Assessment System Manual: For Use with the Interrai Ed Screener (Eds) and Ed Contact Assessment (Ed-CA):

The interRAI Emergency Department (ED) Assessment System Manual is a key component of the interRAI Hospital

Assessment Systems. It is designed for use among older patients who visit the emergency department. The interRAI Emergency Department (ED) Assessment System is a two-step screening and assessment system. Two consecutively administered instruments within the interRAI ED Assessment System define this two-step protocol: (1) the interRAI ED Screener, and (2) the interRAI ED Contact Assessment (ED-CA).
