Ronald L. Schow, Michael A. Nerbonne : Introduction to Audiologic Rehabilitation (4th Edition) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Introduction to Audiologic Rehabilitation (4th Edition):

This much anticipated Fourth Edition is the most current text available for preparing students for work in the area of audiologic rehabilitation. This highly regarded text has been extensively updated and revised. The text begins with

eight chapters introducing the fundamentals-amplification, including cochlear implants, auditory and visual stimuli, speech and language, and educational and psychosocial issues. Two comprehensive methods and procedures chapters follow, focusing on children, adults, and elderly adults. Finally, the well-documented and amply illustrated text concludes with two case study chapters.
