**Frederick N. Martin, John Greer Clark : Introduction to Audiology (12th Edition) (Pearson Communication Sciences and Disorders)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Introduction to Audiology (12th Edition) (Pearson Communication Sciences and Disorders):

By Lv This book is extremely hard to follow for the introductory student. The way it is organized creates confusion as it frequently references information in subsequent chapters. I ended up also purchasing the e-text from Pearson directly. It was far more cost effective and provided access to the site for videos, which give a MUCH better insight into things than the written detail. The author is extremely well reputed in the field, but the writing is hard to follow and seems as though it could be simplified for the burgeoning student. Some redundancy is appreciated in

textbooks to reinforce learning, however in this book, the authors syntax and general style create more confusion. I find myself frequently looking up details elsewhere, and better understand the concepts when they found outside of this text. 1 of 1 people found the following review helpful. Horrible. By Mr. Math Expert Introduction to Audiology is an horrible book because it's so technically dry, boring, and seemingly pointless. I found the online resources to be frankly straightforward, clear, and to the point. Everyone in my class has agreed on this. 1 of 1 people found the following review helpful. Hardly used textbook at all. By Kindle Customer I was required to buy this text for a class, but I hardly used it. The text is not written well - it's hard to follow and extremely boring. The only times I've found the text useful is for looking up a couple of definitions in the glossary. Other than that, all of the information I've needed for my class has come directly from the lectures. My computer does not have speakers so I haven't even opened the cd, but again, I haven't needed that information either. This text may be more interesting to someone in the field of audiology; I am in the field of speech language pathology and just can't get interested in the audiology classes at all. I would say if you're taking a class online see if you can get by with just the lectures and don't waste your money on this text (I'm taking SST 456 through Northern Arizona University online).
