Sandra Levey : Introduction to Language Development Workbook before purchasing it in order to gauge whether or not it would be worth my time, and all praised Introduction to Language Development Workbook:

The Introduction to Language Development Workbook is designed to accompany the Introduction to Language Development textbook, for use in undergraduate language acquisition courses in speech-language pathology programs. This useful resource extends and reinforces the major topic areas covered in the text, including morphology, phonology, semantics, syntax, pragmatics, literacy development, and multicultural and multilinguistic

differences. Corresponding to each chapter in the text, the author has included a variety of useful tools for self-study, including: *Multiple choice items* *Sentence completion exercises* *Discussion questions* Introduction to Language Development Workbook will help students engage with the material and develop a deeper understanding of the concepts presented in the textbook.

About the Author Sandra Levey is a faculty member at the City University of New York, Lehman College. She received her Ph.D. in Speech Language Hearing Sciences at the Graduate Center of the City University of New York and an M.A. in Linguistics from Stanford University, with a minor in African Studies. She has received research grants for study at Bayero University in Kano, Nigeria, and has served as a consultant in Bratislava, Slovakia, for a study of Slovakian childrens morpheme acquisition and as a guest lecturer for speech-language pathologists and linguists from Slovakia and the Czech Republic. Her research and publications have focused on bilingualism and cultural differences, and she has presented her research efforts in national and international conferences. She is the editor and has authored chapters in the textbook Language Development: Understanding Diversity in the Classroom, a text designed to help pre-teachers understand childrens language development and the language diversity found in classrooms.
