**Donald P. Ridgway : Introduction to Vascular Scanning: A Guide for the Complete Beginner (Introductions to Vascular Technology)(3rd Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Introduction to Vascular Scanning: A Guide for the Complete Beginner (Introductions to Vascular Technology)(3rd Edition):

1 of 1 people found the following review helpful. You need this!By Brandy PecorVery thorough and well written.1 of 1 people found the following review helpful. ... - THIS IS THE BOOK FOR YOU - IT'S WONDERFUL.By Diana RickerIf you are REALLY looking to learn Vascular Ultrasound - THIS IS THE BOOK FOR YOU - IT'S

WONDERFUL.3 of 3 people found the following review helpful. Great Source for CME'sBy Julia A. AndrewsHaving been an Registered Vascular Technologist since the 1980's I am always on the search for interesting material to keep my CME's up-to-date. Thanks to Don for providing 12 SDMS CME's for the experienced tech and a great review book for the beginner! I have just cruising through for another good review with CME's I will let you know how the search goes.Update: 05-17-10: Since this was published I have also purchased Vascular Technology: An Illustrated Review, Fourth Edition that is also an excellent review for the RVT exam or 12 SDMS CME's. Great combo review!Happy Reviewing!

For novice scanners and for sonographers and echocardiographers cross-training in vascular ultrasound, here is the improved third edition of Don Ridgway's very popular, unabashedly practical, and famously unique guide to performing vascular studies now with Uncle Don's Bonus Image Section, new chapters on the Doppler principle, those darn Doppler angles, and other vascular diagnostic modalities, plus new illustrations, new scanning exercises, and expanded coverage of carotid scanning, abdominal Doppler, upper and lower extremity scanning, and color flow imaging. As if that weren't enough, the latest edition is approved for 12 hours of SDMS-approved CME credit.

About the AuthorDon Ridgway is a practicing vascular technologist and an instructor in the vascular technology program at Grossmont College in California, where he was responsible for seeing that program become the first vascular technology curriculum to receive American Medical Association accreditation. Don brings teaching skills from several different disciplines and areas of experience: He has taught writing and fencing (swords, not chain-link) at San Diego State University, and for ten years he played and taught bluegrass banjo, mandolin, guitar, and Dobro. He still gets to pick occasionally when he is not on call, lecturing, or grading quizzes.
