Should be Burned.By Hilary Kim MordenI cannot believe that this text (and I use that term loosely) is used to educate (and I use that term loosely as well). When you write information (again, term used loosely) regarding specific races/cultures that describe interaction with them in a similar manner that a dog training manual would describe interaction with a feral animal, you really need to check your

prejudices. This text should be burned (and I love books and would never, ever advocate burning one but this one - it needs burning - all copies - and then it needs to go out of print).30 of 31 people found the following review helpful. Bias Author-Not educational at allBy MalindaThis is the worst book I've ever read about different cultures!! This author has clearly never been experienced with other cultures. To teach this to students is not just inappropriate but completely false. It negatively stereotypes African Americans, Native Americans, and was inaccurate of Asian culture. Yet spoke only positive of European Americans.This book is GARBAGE

With today's emphasis on disease prevention, LPNs must be able to deal with the increasing demands placed on them in their role in patient education and health promotion for patients through all stages of the life cycle. This text is written specifically for LPN/LVN students.
