David Cline, O. John Ma, Judith E. Tintinalli : Just the Facts in Emergency Medicine before purchasing it in order to gage whether or not it would be worth my time, and all praised Just the Facts in Emergency Medicine:

1 of 1 people found the following review helpful. Just the Facts in Emergency MedicineBy R. Capps OetersI am currently prepping for the ConCert exam and am trying to streamline my studies. I am also answering lots of questions from various sources. Just the Facts seems to cover all the important points (i.e., has the answers to most of the questions), without bogging you down. It would not be a good resource for someone just starting to learn EM, but is a great resource for those who just need a review.7 of 7 people found the following review helpful. Great review for inservice/boardsBy David H Whitaker"Just the facts" Great quick review for emergency medicine in-training exams / boards exams. One could read this text in two weeks just before the exam and retain the most relevant information. Highly recommended.

"Just the Facts in Emergency Medicine" is a "high-yield" companion to the "Tintinalli Study Guide" containing key concepts for board certification or re-certification. Its bullet-style format has been prepared under the guidance of the American College of Emergency Physicians and may be a useful addition to the Tintinalli "package" - textbook, handbook, pre-test and CD-ROM.

This is a very enjoyable book to read. The amount of material in each chapter is good, with just the key facts included and the fluff removed. The concise and consistent format makes it easy and quick to read. It will likely become a popular companion to the fifth edition of Tintinalli. -----Weighted Numerical Score: 87 - 3 Stars
