HCPPro a division of BLR, Jugna Shah MPH : JustCoding's Injections and Infusions Coding Handbook (Pack of 5) before purchasing it in order to gauge whether or not it would be worth my time, and all praised JustCoding's Injections and Infusions Coding Handbook (Pack of 5):

1 of 1 people found the following review helpful. Four Stars By Customer gives great insight on how to code multiple infusions and IVP meds. 0 of 0 people found the following review helpful. I really did get some good information out of this little book. By 1sturgill really did get some good information out of this little book...but I wish it had been a little more in depth 1 of 1 people found the following review helpful. Not helpful. By Sue I am disappointed with this purchase. I did not find it all helpful.

Drug administration coding doesn't need to be difficult. Drug administration is one of the most common services provided in the outpatient setting, and while the rules and codes have not changed significantly since 2009, coders still

have questions about how to apply the CPTreg; guidelines and follow CMS' guidance. This handbook begins with a review of drug administration concepts, including definitions of common terms. It then walks through the hierarchy that outpatient facility coders use to select the initial drug administration service. The handbook also explains how to properly determine when to report concurrent, subsequent, and additional hours of substances and when to report hydration. Included are 15 case examples of varying complexity for coders to test their understanding of drug administration principles. The correct coding for each example is provided, along with explanations highlighting key code assignment concepts. The handbook concludes with some frequently asked questions about drug administration. Resolve your toughest drug administration coding challenges!

Table of Contents Introduction Definition of drug administration terms Importance of correct drug administration reporting CPT coding Codes and coding guidelines Drug administration hierarchy Documentation requirements CPT vs. Medicare rules Coding scenarios Chemotherapy Multiple infusions Subsequent drug administration Concurrent infusions Multiple drug pushes Hydration Coding scenario answers and explanations

About the Author Jugna Shah, MPH, is the president and founder of Nimitt Consulting, Inc., a firm specializing in case-mix payment system design, development, and implementation. She has extensive experience helping providers understand and address the ongoing clinical, operational, and financial implications of Medicare's outpatient prospective payment system based on APCs. She has educated and audited hospitals on their drug administration coding and billing practices. Shah has contributed to several books and numerous OPPS/APC articles over the past 14 years. She is also a contributing editor of HCPro's Briefings on APCs.
