Alexandra Patricia Adams BBA RMA CMA (AAMA) MA, Deborah B. Proctor EdD RN CMA : Kinn's The Medical Assistant: An Applied Learning Approach, 10e (Medical Assistant (Kinn's)) before purchasing it in order to gage whether or not it would be worth my time, and all praised Kinn's The Medical Assistant: An Applied Learning Approach, 10e (Medical Assistant (Kinn's)):

0 of 0 people found the following review helpful. Great Book!By meg86I've had this book before when I was in college and I loved it. It's easy to navigate through the chapters and easy to find the information needed. I had to buy this book because I misplaced my previous one :-(I am very excited to get this book and review it once again for my new job. Very excited!!! I would recommend this to anyone who is just thinking about becoming a Medical Assistant, It will give them a very good idea of what to expect in the field. I'll be buying the newest edition in September when it

comes out. 1 of 1 people found the following review helpful. Here again, I am many years late with this ...By Cocker
Mom 3Here again, I am many years late with this review, but the book was a very appropriate introduction into the
world of the front office in the healthcare field. 0 of 0 people found the following review helpful. GreatBy
CustomerWas in great shape.

This new 10th edition includes the most current content to meet national curriculum and accreditation standards and still has the depth and breadth expected of Kinnrsquo;s The Medical Assistant: An Applied Learning Approach. Its instructive features, such as chapter outlines and learning objectives, enhance both the learning and teaching experience. With its focus on personal qualities, skills, responsibilities, types of patient education, and legal and ethical issues, the text remains the strongest foundation for learning the medical assisting profession. Applied Learning Approach introduces a case scenario at the beginning of each chapter, then revisits it throughout so students can easily apply what they have learned to the clinical setting. Critical thinking applications test content knowledge and critical thinking skills. Procedures presented in a clear, step-by-step format with illustrations where appropriate. New chapters on The Office Environment Daily Operations and Privacy Risk Management focus on the latest administrative office trends and issues. Includes the most current content competencies associated with CAAHEP and ABHES, including IV therapy, patient education, and documentation. Integrated case scenarios within each chapter include more application and exercises. HIPAA tie-ins within text demonstrate the importance of understanding and adhere to the HIPAA guidelines. Includes an interactive CD Companion packaged with the text that features additional exercises for testing content knowledge and critical thinking skills, AltaPoint's Electronic Medical Record software, sample skills-based exercises from Medical Assisting Online, online math review and drug calculations online exercises, and charting and documentation examples.
