**Johanna L. Chelcun Clinical Assistant Professor MHS PA-C, Kathy Moini Clinical Assistant Professor RD
CNSC MHS PA-C : LANGE PANCE/PANRE Flashcards** before purchasing it in order to gauge whether or not it
would be worth my time, and all praised LANGE PANCE/PANRE Flashcards:

1 of 1 people found the following review helpful. Be prepared to work on them for weeks By CSI thrive on flashcards
and this set really helped me improve my scores, but required a TON of work. I got this set during clinical year to help
with EOR exams and PANCE. The information is largely a block of text and is woefully incomplete. It has been useful

for me to go through them during the clinical year and highlight/draw/add my own notes from other sources, so now I have a valuable set. I would do this during each rotation, focusing on the cards for that EOR exam. That broke it up into reasonable chunks. The set alone will provide you little benefit. A well used set may actually be more valuable. This set of cards consists of one card for (roughly) each topic on the PANCE blueprint, meaning it is helpful for PANCE (with your added notes) but will be incomplete for EOR exam blueprints, which lists are slightly different. The cards are very large, and I was never able to find an index card holder that fit them. This means they weren't very useful for on-the-go studying (as they are regular paper and not heavy cardstock). They need to come with their own plastic card holder that can hold a couple dozen cards and fit in your white coat. 4 of 4 people found the following review helpful. Be prepared to add in your own notes. By Ashley Like them because it gives an overview but lots of big hallmark points missing... Went through with step up to medicine, cert and recert of physician assistants and usmle step 1 ck and added additional notes to each of the cards and color pics in the derm section... I can't imagine someone would do well on the pance/ panre studying these cards alone... Plus just as an FYI these cards are big ... 0 of 0 people found the following review helpful. Not cardstock or small. By newblackman If you are looking for a study aid you can fit in a pocket, reasonably durable and small, DON'T buy these. These are not cards, despite the description. They are loose papers the size of a paperback, and as flimsy as you'd expect. Simply returning them to their box without damage is difficult. Also, the photos had black and white color only on the few I examined. Thankfully the vendor is allowing me to return this for a full refund.

362 high-yield cards offer a fun, fast, and effective way to test your knowledge of important diseases and disorders. Take the stress out of physician assistant certification and recertification by reviewing the major diseases and disorders and their symptoms and treatment. Test your knowledge of hundreds of major diseases and disorders. Each card includes: Etiology/Pathophysiology HP Exam Findings Laboratory Diagnostics Differential Diagnosis Clinical Intervention. Follows the NCCPA examination blueprint. Study on-the-go, quiz yourself, or brush up just before the exam. Enhances any study method.

About the Author: Johanna L. Chelcun, MHS, PA-C is Clinical Assistant Professor in the Physician Assistant Program at Quinnipiac University in Hamden, CT. Kathy Moini, CNSC, RD, MHS, PA-C is Clinical Assistant Professor, Educational Coordinator in the Physician Assistant Program, and Chair of Graduate Admissions at Quinnipiac University in Hamden, CT.
