**Randy G. Stair, Dwight A. Polk, Geoff Shapiro, Nelson Tang : Law Enforcement Responder: Principles of Emergency Medicine, Rescue, and Force Protection** before purchasing it in order to gage whether or not it would be worth my time, and all praised Law Enforcement Responder: Principles of Emergency Medicine, Rescue, and Force Protection:

1 of 1 people found the following review helpful. A lot of useful information.By Bonnie MillerMy husband got this book for a class and ended up loaning it to a fellow officer in the same class. A lot of useful information.0 of 5 people found the following review helpful. Very DisappointingBy PubliusReduxDoes not seem to cover even half the topics listed for testing on the TP-C Certification Exam...and those topics on which it does have material...it seems very "light" on the kinds of details that exam would test for. So definitely not a TP-C prep book even though it IS listed as "recommended" reading by the BCCTPC. :-(2 of 2 people found the following review helpful. Great resource for law

enforcement medics  
By Bruce  
When I took the tactical medic certification test, this was one of the suggested review books. It was an excellent resource as far as Tactical law enforcement. Any paramedic worth his or her salt could pass the ALS portion of this test. Subsequently our department switched to this textbook for the LER's. We switched from the Brady which was primarily fire department based and our test scores WENT UP! The student evaluations of the curriculum couldn't have been better. Finally an emergency medical textbook written specifically for Law Enforcement. Thank you!

The Essentials of Law Enforcement Emergency Response Public safety professionals and emergency responders today face greater threats than ever before in our history. The traditional role of law enforcement has vastly expanded to require extraordinarily broad-based emergency response capabilities. Law Enforcement Responder: Principles of Emergency Medicine, Rescue, and Force Protection prepares homeland security leaders, law enforcement officers, security professionals, and public safety officials for the wide range of emergency responses they must perform on a daily basis. Law Enforcement Responder explores the vast array of law enforcement demands for emergency responses including resuscitation, trauma, and illness, as well as the essential considerations for special populations such as children and the elderly. The textbook addresses all of the competency statements in the National EMS Education Standards at the Emergency Medical Responder level, as well as additional lifesaving content specific to law enforcement that far exceeds the core curriculum. Law Enforcement Responder accommodates the tremendous diversity in the modern law enforcement mission by providing current and expert emergency medicine content in a highly adaptable format. Nationally recognized experts present key mission-specific topics, including police officer survival, tactical medicine, executive protection, active shooter response, canine first aid, military medicine, travel medicine, in-flight emergencies, ordnance ballistics, less lethal munitions, incarceration and prisoner care, fire-rescue and hazardous materials, and much more.
