Karen Judson, Carlene Harrison : Law Ethics for Medical Careers before purchasing it in order to gage whether or not it would be worth my time, and all praised Law Ethics for Medical Careers:

0 of 0 people found the following review helpful. Scrub Tech required bookBy SheRocks21I liked it because it fulfilled my class requirements and is something I have kept in hand for reference.0 of 0 people found the following review helpful. I Love This Book!By Kristen HewawasamI used this book for a medical law and ethics course in college and it's so detailed and interesting. I kept it to refer to and read for other courses and I definitely recommend it if you need a book that has anything to do with its subject matter. The editions are not really specific. There is a chapter on current healthcare data, but if you get an older edition you definitely aren't missing anything you could easily Google. This is great, if you are on the fence about buying it, do it!0 of 0 people found the following review helpful. Easy Interesting ReadBy joshua wilsonThis book engages the reader, and has review material that challenges your recall memory of the material. I picked up the book to learn a little bit of an intro into medical ethics, and it has

been a great read. The book is littered with real life case studies that hammer home the topics covered. Would recommend for anyone looking for a book over medical ethics or any other future premeds out there

Law and Ethics for Medical Careers, Fifth Edition, provides an overview of the laws and ethics you should know to help you give competent, compassionate care to patients that is within acceptable legal and ethical boundaries. The text can also serve as a guide to help you resolve the many legal and ethical questions you may reasonably expect to face as a student and, later, as a health care practitioner. The text features pertinent legal cases, anecdotes, and sidebars related to health-related careers. Content has been updated and special attention has been paid to legislation affecting health care.

About the Author Karen Judson taught biology laboratories at Black Hills University in Spearfish, SD., high school sciences in Idaho, and grades one and three in Washington state. She is also a former laboratory and x-ray technician and completed two years of nurses' training while completing a degree in Biology. Carlene Harrison is the Dean of the School of Allied Health at Hodges University and is also currently serving as Acting Chair of the Health Administration Program.
