Stephen P. Taylor BSc MSc PhD FBCO FAAO : Law in Optometric Practice, 1e before purchasing it in order to gage whether or not it would be worth my time, and all praised Law in Optometric Practice, 1e:

Law in Optometric Practice provides an authoritative guide to the running of an optometric practice and the legal framework in which an optometrist must work. Due to extensive changes within the field, this book provides the most up-to-date and reliable source of information for all those working in optometric practice. First of its kind, providing optometry students and practitioners with all the background information that they need on practising within a legal framework. Covers all aspects of European law. Clear and contemporary, its straightforward no-nonsense approach helps to demystify the subject. Takes into account new legislation and recent lively ethical debates.

"Here is a book which fills a definite need... a milestone to be applauded" From a review of the previous Edition, Law and Management in Optometric Practice, Optician
