**Gerald (Jerry) R. Ledlow, M. Nicholas Coppola : Leadership For Health Professionals** before purchasing it in order to gage whether or not it would be worth my time, and all praised Leadership For Health Professionals:

2 of 2 people found the following review helpful. Don't Waste Your Time and Money on This Drive. By S.B. This book was the worst textbook I've ever read. It's full of repetitive phrases and is written by two people who sound egotistical and pompous. They are so focused on spouting off dozens of theories without actually discussing their applicability and implementation. They also assert that you cannot be an "effective, efficient, and efficacious" (one of their favorite phrases) leader if you are an introvert and/or if you have any plans to have a family. Basically, good leaders are overbearing, boisterous individuals who are married to their job and heartless (based on their position). I would not recommend this book to anyone. 1 of 1 people found the following review helpful. Easier than buying from school. By Vanessa Had to buy this book for a course in my Masters program. Wayyy better than buying the one from school and its the same exact book. 2 of 2 people found the following review helpful. there is a chapter on general theory - what makes ... By Mike B. there is a chapter on general theory - what makes a theory and the thought process

behinnnnnnnnnnnnn....oh sorry I feel asleep reading this book again. sold this book the day after my class ended.

An All-New Second Edition of the Essential Health Leadership Text *Leadership for Health Professionals: Theory, Skills, and Applications, Second Edition* is the first textbook of its kind to apply classical knowledge of leadership theory and time-honored best practices of industry leaders to a health organization context. This comprehensive and well-organized text is grounded in real-world applications of theoretical concepts, and focuses on practical examples of leadership practice in actual healthcare scenarios. The text's innovative and dynamic pedagogical structure cycles and expands key concepts throughout the text, allowing for enhanced learning and information retention. The material supports and engages students, pushing them to synthesize solutions and develop leadership strategies that are flexible enough to address an ever-changing industry. The fully-revised and updated Second Edition includes new material supporting leadership in high performing organizations, as well as a stronger emphasis on leading systems and sub-systems of health organizations. The Second Edition also features a new chapter on the healthcare supply chain and integration with revenue management and finance, expanded material on competencies and motivation, new material on emergency and disaster preparedness for hospitals and public health systems, and expanded material on strategic and operational planning. Ideally suited for graduate or upper-level undergraduate students in health professions programs, *Leadership for Health Professionals, Second Edition* is the essential text for future healthcare industry leaders. Key Features Text developed based on competencies from the Healthcare Leadership Alliance Competency Directory Practical, real-world cases from health leaders across the industry that demonstrate the application of theoretical principles in practice Material organized in four parts according to Blooms Taxonomy of the Cognitive Domain, which encourages retention, synthesis, and learning Instructor Resources, including an Instructors Manual, PowerPoint Presentations, and a Test Bank Each new copy of the text includes an access code to the Navigate Companion Website with helpful Student Resources
