**Carson F. Dye : Leadership in Healthcare: Essential Values and Skills (American College of Healthcare Executives Management Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Leadership in Healthcare: Essential Values and Skills (American College of Healthcare Executives Management Series):

0 of 0 people found the following review helpful. Rent, read, enjoy!  
By Anne Taylor I typically skim through leadership books, but I actually read every single page of this one and enjoyed it - remarkable, as it was for a graduate school management class! I was VERY happy and HIGHLY recommend renting this book if it is for a class. I had been expecting a full blown textbook, but it's the size of a regular book so you'll be pretty sad to have spent \$70+ on this bad boy. Renting is the way to go, plus mine came with some helpful highlighting from a previous user. This book has a lot to offer for those looking to explore different management techniques and how to navigate leadership in healthcare.  
0 of 0 people found the following review helpful. Expression of grand ideas in simple words  
By Christina Unlike many other textbooks, Carson Dye's work is a piece of art. He does not only write well, but he also expresses his ideas in a clear manner. The language of the book is very understandable. Chapters are short and easy to comprehend. The light nature of the book does not, however, minimize the grand ideas and tips of how to become a good leader. Each and every word has a meaning without going around the idea, but simply stating it. Compared to other books on leadership and management, this one blows the competition away and is highly recommended.  
1 of 1 people found the following review helpful. Read every page!  
By Katrina P. Sheets I read every single page of this book by choice. My class had sections to read and I read the whole book. Very well written with many helpful tips!

Leadership in Healthcare explains the connection between values and leadership. It defines the role of both personal and team values in improving behavior, performance, and morale. It also offers practical strategies for strengthening leadership and interaction skills and for enhancing overall effectiveness. Case studies, exercises, and self-assessment tools are included in the book to help readers internalize and apply the concepts.

This book is a must read for those who are desirous of looking at themselves and taking that first step to truly enhance their leadership performance. Ten years later, Carson's message is as fresh and important as when he first penned this book. It is still all about how we interconnect with each other on behalf of those we serve to make their lives better. -- Michael H. Covert, FACHE, President and Chief Executive Officer, Palomar Pomerado Health, San Diego, California, from the Foreword  
Leadership in Healthcare: Essential Values and Skills demonstrates how successful leadership is clearly anchored in well-understood values and encourages the reader to maximize leadership capabilities by developing and practicing a suitable personal value system. Carson Dye is to be applauded for writing and updating this eminently useful book on what is inarguably the most critical competency needed by healthcare leaders today. -- Stephen J. O'Connor, PhD, FACHE, Professor, Dept. of Health Services Administration, School of Health Professions, University of Alabama at Birmingham, Birmingham, Alabama, from the Foreword  
About the Author Carson F. Dye, MBA, FACHE, CEO of Exceptional Leadership, combines 21 years of health system leadership and 23 years of consulting experience. He has conducted several hundred CEO, senior executive, and physician executive searches for academic medical centers, large health systems, small-to-medium sized hospitals, and universities. Dye provides consultation in leadership assessment, physician engagement, and board relations. He has done extensive physician leadership development and built several physician leadership academies. Certified by Hogan Assessment Systems to use their psychological inventories for selection, assessment, and coaching, he helps individual leaders and teams enhance their effectiveness. Since 1987, Dye has taught many programs for the American College of Healthcare Executives (ACHE) and presented workshops for over 38 state hospital associations. He currently teaches leadership and human resources in the University of Alabama-Birmingham Executive Master's program. Author of 10 books, including ACHE Books of the Year, Leadership in Healthcare: Values at the Top and Developing Physician Leaders for Successful Clinical Integration, his physician leadership book has been used as a model for physician leadership academies. The Dye-Garman Leadership Competency Model from Exceptional Leadership book has been used widely as a competency model for assessment and development.
