From Brand: American College of Physician Executives : Lessons Learned: Stories from Women in Medical Management before purchasing it in order to gauge whether or not it would be worth my time, and all praised Lessons Learned: Stories from Women in Medical Management:

Lessons Learned: Stories from Women in Medical Management 2013, 252 pages Women physicians now comprise 50

percent or more of most U.S. medical school classes. Yet relatively few fill the most senior management positions within the health care system. In "Lessons Learned: Stories from Women in Medical Management," editor and author, Deborah Shlian, MD, MBA, profiles 24 exceptional female physicians who have defied the odds. They share their personal and compelling stories- including obstacles and challenges faced in balancing work, family and personal life- as their career paths take them from clinical medicine to leadership within government, academia, hospitals, provider groups, managed care, pharma, consulting and entrepreneurial venture. The lessons they learned are not only relevant to women and not just applicable to health care-they are universal. At a time when most agree that the U.S. health care delivery system needs fundamental change, this book makes the case for talented women physician executives, articulate in the language of health care policy and business, to be among those leading the way. Deborah Shlian, MD, MBA, has three decades of clinical, management, consulting and physician executive recruiting experience. She has authored two books related to health care management and careers in the industry.
