Emily Hansen, Gary Easthope : Lifestyle In Medicine (Critical Studies in Health and Society) before purchasing it in order to gage whether or not it would be worth my time, and all praised Lifestyle In Medicine (Critical Studies in Health and Society):

0 of 0 people found the following review helpful. Nice read.By Erin Leslee DamesCompact and portable, very interesting concepts and correlations presented. Very glad I chose this book and would recommend to those interested in preventive medicine and public health.

In Western societies, 'lifestyle' as an explanation for health and illness has become increasingly popular. *Lifestyle in Medicine* explores the ambiguity of the term 'lifestyle' and the way it is conceived and applied within medicine. Based on real doctor-patient consultations and in-depth interviews with doctors, the book discusses: the history behind current medical use of lifestyle the variable usage of the 'lifestyle' concept in different medical settings critical writings and recent shifts in sociological thinking about lifestyle public and government concerns about unhealthy lifestyles the ways in which health is discussed, doctor to patient. Evidence-based in its approach, this book uses original research to highlight this topical issue and provides professional and lay perspectives on health and illness. It is essential reading for students and academics of medical sociology, health and allied health studies and anyone interested in health and society.

About the Author Gary Easthope is an Associate Professor of Sociology at the University of Tasmania, Australia. He has eclectic research interests and has published books, book chapters and articles on education, social research methods, ethnicity and health, disability, the wilderness movement, drug use and alternative medicine.
