Gregory L. Wheeler BS RT(R), Kathryn E. Withers RT(R) (MR) : Lippincott's Magnetic Resonance Imaging Review before purchasing it in order to gage whether or not it would be worth my time, and all praised Lippincott's Magnetic Resonance Imaging Review:

0 of 0 people found the following review helpful. wrong answers/misguided questions and poor quality pictures for identifying anatomic structures that are almost ...By hfrigumsThere are many questions that are helpful here, but many drawbacks as well.Drawbacks include: wrong answers/misguided questions and poor quality pictures for identifying

anatomic structures that are almost completely blacked.0 of 0 people found the following review helpful. The anatomy pictures are beyond terrible, so dark you are unable to see what ...By Melissa P.This Is just OK. The anatomy pictures are beyond terrible, so dark you are unable to see what it is they are pointing too. And I felt like it was a little overkill.6 of 6 people found the following review helpful. Good ReviewBy Jackalyn BrannanThis book has a great questions that I did not learn in the MRI in practice book. The questions are on the difficult side, which has it's good and bad points. On one hand, it is great if you can answer the questions correctly, you will probably pass your boards. On the other hand, unless you have successfully passed a MRI course or read the MRI in practice book, this review book may be difficult to extract information from. The book does give detailed answers in the back of the book, includes two practice tests, and has the questions divided into sections like the board exams. All in all, I would buy the book and would recommend the book. I hope this helps. Good luck to everyone taking the boards.

Here's the perfect review tool for radiologic technologists taking the ARRT's Advanced Qualifications Examination in Magnetic Resonance Imaging. It's packed with over 700 questions and answers covering all aspects of MRI. Detailed explanations of answers and references for further study help reinforce problem areas.
