Rebecca Hanlon, John Curtis, Hulya Wieshmann, David White, Caren Landes, Val Gough : Long Cases for the Final FRCR 2B (Oxford Specialty Training) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Long Cases for the Final FRCR 2B (Oxford Specialty Training):

0 of 0 people found the following review helpful. moderateBy amr saadawythe images are not so clear...looks like scanned not printed...not so bad...but not impressive..needs more images and cases..needs more discussion..0 of 0 people found the following review helpful. badBy Dr-almutawanot informative as it supposed to be!it is also has bad quality pages(as photo copy),i didnt like it at all!

This comprehensive revision book contains 42 practice long cases, to help radiology trainees revise for and succeed at the Final FRCR Part 2B examination. Each case is presented as it would appear in the exam, with a selection of high quality imaging and clinical details, followed by a separate model answer section, formatted in line with the Royal College guidance notes. Each case also comes with key points explaining the answer and a further reading list. Written by a highly-qualified team of authors, with a wealth of clinical, teaching and exam experience, the book also contains essential hints and tips on exam technique to help radiology trainees pass this final hurdle.

About the Author Rebecca Hanlon has worked as a Consultant Radiologist at University Hospital Aintree in Liverpool for the last 10 years, specialising in head and neck imaging. During this time she has been heavily involved in teaching and training. Rebecca was a Clinical Tutor at Aintree for 4 years, following which she became Programme Director for the Mersey Radiology Training Scheme. She is a co-organiser of the Liverpool FRCR exam preparation courses and has also contributed single best answer questions and long cases to the Royal College of Radiologists for the Final FRCR 2B examination. John Curtis is a Consultant Radiologist at University Hospital Aintree in Liverpool, specialising in chest radiology. He is currently Head of School of the Mersey School of Radiology and has an active interest in radiology education. Hulya Wiesmann is a Consultant Radiologist at University Hospital Aintree in Liverpool, specialising in Oncology Imaging, PET CT and Nuclear Medicine. She graduated from the medical school at Freie University Berlin, Germany, and completed her postgraduate training in England. She was one of the clinical tutors at University Hospital Aintree until recently and is actively involved in the regional FRCR teaching programme. David White is the Clinical Director at University Hospital Aintree, Liverpool, UK. Caren Landes is a Consultant Paediatric Radiologist at Alder Hey Children's Hospital in Liverpool. She has a specialist interest in musculoskeletal imaging and imaging in non accidental injury and is actively involved in the education of radiology trainees. Val Gough is a general radiologist who trained in the Mersey scheme and is currently the lead consultant radiologist in Cavan General Hospital, Ireland.
