Aziz Nather : Surgery for the Diabetic Foot: A Practical Operative Manual before purchasing it in order to gage whether or not it would be worth my time, and all praised Surgery for the Diabetic Foot: A Practical Operative Manual:

This is the first textbook on surgery for Diabetic Foot in the world. It is written as a practical surgery manual for residents and young surgeons performing surgical procedures for patients with diabetic foot problems. Such a guide

will be useful not only to residents and surgeons in Singapore but also to our neighbouring countries including, Malaysia, Indonesia, Hong Kong, India, Sri Lanka etc. Each surgical procedure is written in a systematic fashion covering indications, pre-operative preparation, anaesthesia, patient positioning, operative technique (in step by step fashion and illustrations) and post-operative care. The scope covers all aspects of surgery for diabetic foot from surgical debridement, split skin grafting, surgery for osteomyelitis, minor amputations including ray, transmetatarsal, Lisfranc, Chopart and Modified Pirogoff amputation to major amputations such as below knee, through knee and above knee amputation. It also includes assessment for revascularisation and revascularisation procedures. This book will serve as a useful practical guide for training surgical residents and for surgeons aspiring to do diabetic foot surgery.
