Michelle Heller : Synapse EHR 1.1 An Electronic Charting Simulation Exercise before purchasing it in order to gage whether or not it would be worth my time, and all praised Synapse EHR 1.1 An Electronic Charting Simulation Exercise:

1 of 1 people found the following review helpful. not what i expectedBy duy nguyenIt's the book that i wanted, not the software. I had to give this a low rating, if not then 5 stars from me.

Synapse EHR 1.1 is a generic educational software program that teaches users to build patient electronic records and to record information that is routinely entered by the medical assistant. Synapse EHR 1.1 exercises simulate the most common tasks the medical assistant performs in the medical office. System Requirements Microsoft Windows 2000, Windows XP (Service Pack 3), or Vista (Service Pack 1), MS Office 2003, MS Office 2007 Pentium or Celeron PC with 300 MHz or higher processor recommended; 233 MHz minimum required 128 megabytes of RAM or higher

recommended 1.5 gigabytes of available hard disk space (If using a USB Flash Drive, must have atleast 50MB of free space available) Super VGA (800 x 600) or higher-resolution video adapter and monitor CD-ROM or DVD drive; USB port if using a USB Flash Drive Keyboard and mouse or compatible pointing device
