Clifford W. Brooks OD, Irvin Borish OD DOS LLD DSc : System for Ophthalmic Dispensing, 3e before purchasing it in order to gage whether or not it would be worth my time, and all praised System for Ophthalmic Dispensing, 3e:

6 of 6 people found the following review helpful. and recommended for optometrists who plan to dispense eyewearBy CustomerThis is a mandatory text for all practicing opticians, and recommended for optometrists who plan to dispense eyewear.I am an optometry student, and a licensed dispensing optician with an ABO Master certification.Excellent resource for all things related to ophthalmic optics.Well laid out, and the updated version here has color photographs. I've used the second edition extensively, and opted to purchase this third edition for my own reference.2 of 2 people found the following review helpful. It's a great reference tool when you come accross special casesBy Lauren SnellThe information is a little outdated, but it still has relevant and practical information about adjusting and fitting eyeglasses. I wouldn't use this as a sole study source for ABO exams. It isn't very well rounded. If you get find this book on sale,

I'd say snatch it up. It's a great reference tool when you come across special cases, out of the ordinary adjustments, and unusual frame materials. 3 of 3 people found the following review helpful. **THE #1 Reference Book for Dispensing** By Elizabeth This is THE book for opticians and optometrists. I used this to study for the AOA and ABO licensing tests and passed both without any problems prior to using it as reference in optometry school. It details the hows and whys of ophthalmic optics and is a phenomenal reference. I am proud to have this book in my collection and do refer back to it even now.

The ultimate ophthalmic dispensing reference, this book provides a step-by-step system for properly fitting and adjusting eyewear. It covers every aspect of dispensing from basic terminology to frame selection to eyewear fitting, adjusting, and repairing. Perfect for both students who are just learning about dispensing and practitioners who want to keep their skills up to date, this resource offers in-depth discussions of all types of lenses, including multifocal, progressive, absorptive, safety, recreational, aspheric, and high index. Plus, it goes beyond the basics to explore the how and why behind lens selection, to help you better understand and meet your patients vision needs. A glossary of key terms provides easy access to definitions. Proficiency tests at the end of each chapter reinforce your understanding of the material through multiple-choice, fill-in-the-blank, matching, and true/false questions. A new full-color design with hundreds of illustrations that clearly demonstrate key procedures, concepts, and techniques. Updated coverage of the latest dispensing procedures and equipment. Detailed information on the newest types of lenses, including progressive, absorptive, aspheric, and atoric. Updated photos feature more current frames and lenses, keeping the book up to date with today's eye care trends.
