**MD, FAAEM, FACMT, FACEP, Editor in Chief, Richard J. Hamilton : Tarascon Pocket Pharmacopoeia 2015 Deluxe Lab-Coat Edition** before purchasing it in order to gage whether or not it would be worth my time, and all praised Tarascon Pocket Pharmacopoeia 2015 Deluxe Lab-Coat Edition:

24 of 25 people found the following review helpful. I like having this in my lab coatBy John PamperinI get a new version of this reference book every year. I like having this in my lab coat, because it has several distinct advantages over a pharmacy app. First, its just faster to look things up in this book. I have races with the residents to prove it to

them. By the time you get your phone out, get on the wifi (cell service is awful in the hospital) and get the app running, I have all the information. Among the other big advantages, is that it shows the drugs in relation to its class. Patient can't afford that new ARB? Look at the other ones in that section to see if there is one that's cheaper! It also has dosing instructions (with peds instructions!), major side effects, and off label uses which is something the apps never seem to provide. It also has numerous useful tables, such as dermatomes, QTc prolongating meds and the like. As mentioned by another reviewer, the formatting has changed this year. I don't think the print is smaller, but the margins have increased in size or something. It has gained over 100 pages in thickness, which is quite a bit from its normal growth. Overall, it's one of my essential books where I always buy the latest edition. 12 of 12 people found the following review helpful. Good. By Rosalie Garden Great reference, but bigger, heavier, also some tables printed so small—they are hard to read. Last year's book was better. 7 of 7 people found the following review helpful. font too small. By Michele Farrar Always love these books. I work in a walk in clinic. This book is invaluable. However, I am very unhappy with the font size of the pediatric out patient meds chart. What a disappointment to spend the extra money on the larger version and important chart. Small pediatric out patient med chart font is way too small! What a disappointment. I may send it back for that reason alone.

Used by prescribers around the world, the Tarascon Pharmacopoeia 2015 Deluxe Lab-Coat Edition continues its tradition as the leading portable drug reference packed with vital drug information to help clinicians make better decisions at the point of care. The Tarascon Pharmacopoeia 2015 Deluxe Lab-Coat Edition is an expanded version of the Classic Shirt Pocket Edition, containing more drugs, black box warnings, evidence-based off-label indications for adults and pediatric patients, and additional tables. This reference also includes typical drug dosing (all FDA approved), available trade and generic formulations, metabolism, safety in pregnancy and lactation, relative drug pricing information, Canadian trade names, and an herbal alternative therapies section. Multiple tables supplement the drug content, including opioid equivalency, emergency drug infusions, pediatric drug dosing, and much more. New to the 2015 Edition: New section dedicated to rheumatology FDA guideline updates Added tables for quick reference and ease of use Removal of discontinued drugs and outdated dosing information The Tarascon Pharmacopoeia 2015 Deluxe Lab-Coat Edition is an essential resource for all physicians, pharmacists, nurses, physician assistants, dentists, medical transcriptionists, and other point of care providers. As always, each edition of the Tarascon Pharmacopoeia is meticulously peer-reviewed by experts and is now available in multiple print, mobile, and online formats.
