0 of 0 people found the following review helpful. helping health care professionals identify best practices to preserve and repeatBy LouAnaThis book is intended for a multidisciplinary team of providers, It teaches strategies for Health Care and Health establishes a foundation of how, why, what, and when people of all ages learn and how learning can positively affect a patient, a family, and a diverse communitys ability to understand, manage, prevent and live well with their illness. This book is helps health professionals with the tools they need to provide total patient care, this

book presents a foundation as well as a selection of tools and teaching methodologies to promote health and prevention of illness. Unique to this resource are experience driven case studies demonstrating both successful and unsuccessful cases, helping health care professionals identify best practices to preserve and repeat, as well as analyze why unsuccessful efforts might have failed and how those cases could be handled differently. 0 of 0 people found the following review helpful. I am very happy with this book By Digna Vargas I am very happy with this book, it has helped me regain my knowledge on how to consider teaching strategies to make patients compliance more likely. 0 of 0 people found the following review helpful. Five Stars By morteza shahrabi good

Intended for a multidisciplinary team of providers, Teaching Strategies for Health Care and Health establishes a foundation of how, why, what, and when people of all ages learn and how learning can positively affect a patient, a family, and a diverse community's ability to understand, manage, prevent and live well with their illness. Designed to give health professionals the tools they need to provide total patient care, this unique resource presents a foundation as well as a selection of tools and teaching methodologies to promote health and prevention of illness. Unique to this resource are experience driven case studies demonstrating both successful and unsuccessful cases, helping health care professionals identify best practices to preserve and repeat, as well as analyze why unsuccessful efforts might have failed and how those cases could be handled differently.
