William E Wingfield : The Aeromedical Certification Examinations Self-Assessment Test before purchasing it in order to gage whether or not it would be worth my time, and all praised The Aeromedical Certification Examinations Self-Assessment Test:

1 of 1 people found the following review helpful. This book was an amazing study tool and asset to me for having a ...By CustomerThis book was an amazing study tool and asset to me for having a first time pass on the FP-C exam! The questions to practice in the book are the same in difficulty compared to the FP-C and are worded very much alike. 3 questions on my exam were almost word for word identical to ones I practiced in this text. Will Winfield also makes

the text funny, you will catch yourself engaged and laughing while reading. He also includes great study tips and ways to remember important information. I also used Orcid Lopez Back to Basics book which was a good resource however I found it to be too easy compared to the FP-C questions and not very similar. The ACE SAT is definitely a great book and if you pass the questions in this book you will most likely pass the FP-C! Ryan W. NRP, CCEMTP, FP-C1 of 1 people found the following review helpful. Excellent review book By John Weaver This book is an excellent review for the FP-C exam. The questions are worded very similar to the actual test. Each answer is given rational and explanation as to the correct answer. This is not an all inclusive book. You should take a course/review and use other textbooks for more preparation but this book will put you in test mode. It is a great addition to any flight medic's library. 1 of 1 people found the following review helpful. This book is a good study tool that helped me pass my FPC test By Marc This book is a good study tool that helped me pass my FPC test. There are a lot of questions that are overly specific and more mean and nitpicky than anything. I think that the Back to Basics book is a better buy, but it's nice to have both books to study from.

The ACE SAT will assist the critical care transport provider with preparing to challenge the Certified Flight Paramedic (FP-C), Certified Flight Nurse (CFRN) or Certification for Emergency Nurses (CEN) exam(s). Written by Will Wingfield, a Flight Paramedic/RN with over 15 years experience in the fields of pre-hospital/transport medicine, SAR, TEMS and critical care nursing. Will completed his residency in Nurse Anesthesia in 2008, enabling him to discuss the most advanced physiologic principles with specific focus application to the critical care transport medicine field. Will has trained hundreds of successful FP-C, CFRN and CEN candidates.
