HPro Inc., Nancy Rae Ignatowicz RN BS MBA CCDS : The CDI Toolkit before purchasing it in order to gage whether or not it would be worth my time, and all praised The CDI Toolkit:

0 of 0 people found the following review helpful. Five StarsBy ana e torresa wonderful investment, so easy to follow and great for any beginner

The CDI Toolkit is a must-have collection of customizable electronic forms and tools to further develop and enhance your clinical documentation improvement (CDI) program. Organized in two sections, it provides clinical and practical information along with adaptable tools such as slide presentations, newsletters, queries, worksheets, job descriptions, and networking information. The following Clinical Categories comprise the first section: - The Circulatory System - The Digestive System - The Endocrine System - Hematology - Infectious Diseases - The Integumentary System - Mental Health and Substance Abuse - The Musculoskeletal System - Neoplasms - The Neurological System - Present on Admission - The Renal System - The Respiratory System The second section includes presentations and other materials related to: - CDI for Non-physicians - CDI Program Analysis - CDI Staff Education - Physician Education and Recognition The CDI Toolkit provides the structure and tools necessary to develop and enhance a comprehensive CDI program that facilitates ongoing education for CDI staff, coding staff, physicians, and other clinical staff.

About the Author Nancy Rae Ignatowicz is currently the clinical documentation manager at a large university teaching medical center. She previously was a clinical documentation manager at a six-hospital system that includes small- to medium-size hospitals in rural and urban areas in the Midwest. She has more than 30 years of clinical and administrative nursing experience in a variety of healthcare settings, including a county health department and a quality improvement organization. In her current position, Ignatowicz oversees the clinical documentation improvement (CDI) program to ensure that patients' charts accurately reflect the severity of illness on admission and throughout their hospital stay and the services and care provided to them as she did in her previous position. She coordinates physician clinical documentation coding and reimbursement processes to achieve quality and productivity targets for all services and collaborates with colleagues to share information and create interdisciplinary teams for performance improvement. A member of the Association of Clinical Documentation Improvement Specialists (ACDIS), Ignatowicz has been a speaker at its audio conferences and annual conferences and has been interviewed for articles in various professional publications pertaining to CDI.
