Favaloro was one of the men who contributed to one of the medical treatments which saves many, many lives. He started and promoted the Coronary Artery Bypass surgery. In this book, written by him while he was still alive, tell us the way he reached to the performance of the first Coronary Artery Bypass Graft. He started as a rural practitioner in a little rural area of the Argentine Republic, then moved to the United States where he did this, what made of him a Hero of Medicine at Cleveland Clinic. He refused a life full of honors and millionaire offers to come back to his Country, Argentina to fight for the health of his people. He did it and died for it. It is a book that deserves to be read.
