Excellent Clinical Resource for Stuttering TherapyBy SmartshopperI went to Peter Ramig's stuttering therapy conference in Sacramento and I was very interested in his therapy approach. I bought his book through and it is a great resource for explaining the different techniques and providing Fluency shaping and stuttering Modification intervention. There is even information about stuttering in English and Spanish. I don't think I have ever seen such a complete guide. Thank you Mr. Ramig this will be very helpful when I approach preschool intervention as well as students in their teen years.3 of 3 people found the following review helpful. Very HelpfulBy M. OdomThis book is a great tool for techniques, strategies and information for the SLP, parents and

teachers. It is a great resource to utilize with all populations of individuals with fluency disorders. 1 of 1 people found the following review helpful. stuttering treatment book w/cd By EFitzpatrick The book with cd, came in a timely manner, in perfect condition and was packaged so that it came in the shape it was sent.

THE CHILD AND ADOLESCENT STUTTERING TREATMENT AND ACTIVITY RESOURCE GUIDE, 2ND EDITION is the only product of its kind. This book offers specific, hands-on activities that can be used in the evaluation and treatment of fluency disorders (stuttering and cluttering) as well as specific decision-making information that will help clinicians identify goals, and then develop effective and practical strategies to meet these goals. An applied book about therapy, THE CHILD AND ADOLESCENT STUTTERING TREATMENT AND ACTIVITY RESOURCE GUIDE is full of easily-applied therapeutic ideas that are substantiated by solid research findings and thorough explanations.

"Reader-friendly and practical, Ramig and Dodge eliminate much of the mystery out of assessment and treatment for children and adolescents with fluency disorders. From assessment strategies to developing an appropriate IEP to working with parents and teachers to providing basic treatment strategies explained in Part 1, this book is already worth its weight in gold. But even more exciting is Part 2, where the authors supply references to the research data and share hundreds of treatment ideas from their own and other clinicians' experience, providing the rationale and support from experts in the field of fluency disorders for each treatment goal." "Students in practicum and beginning clinicians will be able to adapt an appropriate treatment plan for their clients, and experienced clinicians will find a wealth of new ideas and creative approaches." "This book is a gem and belongs in every clinician's library." --Judith Kuster, Associate Professor Minnesota State University, Mankato "The Child and Adolescent Stuttering Treatment and Activity Resource Guide is a gold mine of therapy techniques and activities in which to teach them. The authors' clinical experiences shine through in their clear explanations of why, when, and how to employ a multitude of tools to increase fluency and make stuttering easier and more like normal speech. Anyone working with children or adolescents who stutter--using almost any treatment approach--will find Ramig and Dodge's book to be a resource brimming with ideas for evaluation, treatment planning, and report writing." --Barry Guitar, Professor University of Vermont. "Authors Peter Ramig and Darrell Dodge have created an outstanding resource for therapists and parents alike, one that is thorough yet readable, detailed yet practical, and helpful without understating what a complex and encompassing disorder stuttering can be. Packed with sound advice, useful information, therapeutic activities, and other diagnostic and treatment resources, The Child and Adolescent Stuttering Treatment and Activity Resource Guide should be regularly consulted by every speech-language pathologist treating children who stutter." --Dale Williams, Associate Professor Florida Atlantic University. "We have a crisis need for helping SLPs work with children and adolescents who stutter and their families and teachers. This need is especially strong in the schools." "This book will be very useful for practicing SLPs or graduate courses in stuttering. It will enhance knowledge about stuttering and improve skills in diagnostics, treatment, counseling, and goal writing." "The book is well organized, is rich in practical material for diagnostics, therapy, and counseling, has 'state of the art' information for goal writing, and has excellent references for additional learning." --Judith Eckardt, M.S., CCC-SLP Board Recognized Fluency Specialist. "I would recommend this book to all clinicians who work with children and adolescents who stutter. It is packed with information and practical activities that will give clinicians confidence and competence in working with this often complex disorder of communication. The authors' writing style ensures that the reader is offered clear guidance as well as choice about the range of therapy options. In addition to the direct speech modification and fluency shaping aspect, clinicians will gain skills in managing the cognitive and affective components of the problem and discover the importance of involving parents and teachers throughout the therapy process. It is an excellent book." --Frances Cook, Principal Speech and Language Therapist, The Michael Palin Centre for Stammering Children. About the Author Peter Ramig is Professor and Associate Chair in the Department of Speech, Language and Hearing Sciences at the University of Colorado in Boulder, where he teaches and specializes in stuttering issues in children, teens, and adults. He is also a member, fellow, and board-recognized fluency specialist of the American Speech-Language-Hearing Association. The majority of Dr. Ramig's professional writings and publications pertain to treatment and efficacy issues related to intervention with persons who stutter. As a working therapist and recognized authority on stuttering, he annually presents many workshops and seminars focused on specific treatment strategies for working with children, teens, and adults who stutter. Darrell Dodge is a certified speech-language pathologist with a private practice in the Denver Metro area. He is an associate of Peter R. Ramig, Ph.D. and Associates at the Greenwood Speech Language Center, a specialty clinic focusing on the evaluation and treatment of children, teens, and adults who stutter. Mr. Dodge received his MA degree in speech-language pathology from the University of Colorado-Boulder and returned later as a lecturer teaching the graduate stuttering course. Voted National Stuttering Association Member of the Year in 1998, he has facilitated numerous adult stuttering support groups and has served as web developer for a website that explores the many aspects of stuttering and includes the essay, "The Veils of Stuttering".
