Andrew Morton Md : The Demise of Medicine before purchasing it in order to gage whether or not it would be worth my time, and all praised The Demise of Medicine:

2 of 2 people found the following review helpful. Good read, indeed. By Nurse DonnaWell written. Witty. To the point. Interesting all the way through the book. Interesting and informative for those in healthcare or not. 4 of 4 people found the following review helpful. A must read!! By Tina Morton This book is both witty and informative. Even with no medical training or knowledge, I understood everything. I found the book to be insightful and it allowed me to

think of my role as a patient. This is a must read for anyone wanting to better understand why medical bills are so high among the many other issues plaguing the healthcare industry.

"The art of practicing actual medicine is not, in reality, tied to some ethereal code of ethics and morality. It is not glamorous. I do not show up in scrubs to a television show and talk to you about which supplements you should or should not be taking. I don't jet off to some developing nation to discuss water sanitation. And no, I don't live in a big house and play golf on Wednesdays. As a matter of fact, my day is mostly focused on survival, both yours and mine." The Demise of Medicine takes a hard-hitting look at the current and future state of health care in America. Family physician and Gulf War veteran Andrew Morton takes readers inside his life as an infantry medic in Desert Storm, a medical student, and finally, a physician, to show the problems with the health care system. From the basic organization of modern health care delivery to the financial structure, liability, and the office visit, the American health care system is a dysfunctional mess. Americans are losing their privacy, autonomy, and choice. Providers may or may not be sufficiently trained to treat the patient they're attending, and everyone is paying the price as the level of health care deteriorates. Forget what you know about what's wrong with the health care system. It's much worse. The Demise of Medicine is upon us

From the Author This book is my every day. If you want to truly understand the basic problems with the health care industry, then this is where you need to start. About the Author Dr. Morton grew up in Milltown, Indiana. Upon graduation from Crawford County High School, he completed his Pre-Medical studies at Ball State University and received his Medical Degree from Indiana University in 1997. He completed his Residency in Family Practice from Naval Hospital Pensacola in 2000. Dr. Morton is glad to be back home after serving 16 years in the Armed Forces. After initially enlisting into the Army Reserve, he was called to serve as an Infantry Medic in Iraq during Desert Storm. Upon completion of his undergraduate studies he accepted a medical school scholarship and commission as an Officer in the US Navy. After Residency, he served as Ship Medical Officer aboard the USS FRANK CABLE (AS-40) serving Asia and the Far East. He then spent time with the Marines at MCAS Cherry Point as Family Physician and Head of Occupational Medicine for the base as well as one of the largest industries in eastern North Carolina, Naval Aviation Depot Cherry Point. Andrew Morton, MD, is a board-certified family physician and Fellow of the American Academy of Family Physicians. In addition to a robust full-time medical practice, he currently holds positions as the medical director for his local nursing home and volunteer fire department, and is the county health officer.
