**From Amer Academy of Orthopaedic : The Diabetic Foot (American Academy of Orthopedic Surgeons Monograph)** before purchasing it in order to gage whether or not it would be worth my time, and all praised The Diabetic Foot (American Academy of Orthopedic Surgeons Monograph):

This text emphasises the diagnosis, procedural management and treatment alternatives - such as casting and surgical intervention - for the diabetic foot. It focuses on fractures and ulcers, with attention given to diabetic neuropathy, the Charcot foot and ulcer management. Also included is a discussion of techniques in amputation and surgical reconstruction as well as research into the use of hyperbaric oxygen and growth factors.
